a
With top journals as the top 5% of each topic-year set, no comparison shows the risk ratio growing
Between scientists, United States
Between scientists, Japan
First top-journal paper, months 12–35
Same scientist, risk ratio after the paper
0.75
1
1.25
Risk ratio after publication / risk ratio before it; same scientist: risk ratio after the paper (log scale; 1 = no change)
b
Top-journal papers mark about twice the award rate in the US and a tenth more in Japan, before as after publication
United States 2014–2021
Japan 2014–2018
0.8
1
1.25
1.5
2
2.5
Risk ratio between scientists, top 5% to all other journals (log scale)
Linked awards (a)
Corrected for detection (a)
Before window, months −24 to <0 (b)
After window, months +12 to <36 (b)
Between scientists
First top-journal paper, matched
Same scientist
